

Work faster and smarter with the #1 industry-preferred embroidery and multi-decoration solution

Still using old Wilcom Embroidery Software? Now is the perfect time to update.

EmbroideryStudio e4.2 has just been released, and with it, more than 50 incredible enhancements to your favorite embroidery software. These will dramatically improve your embroidery and multi-decoration business. Call now and experience the difference it can make to your business.

Save more time

Quicker access with the new 'Recent' features. Instant access to recently used fonts, stitch types and designs. New single-click options. Work on multiple designs in different tabs.

Customer focused solutions

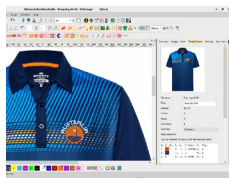

Fast and accurate stitch estimation. Present quotes professionally with high-res product images. Integrated approval process. Improved customer satisfaction.

New creativity tools

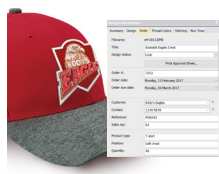

6 add-on Elements now included as standard. New stitch types, New creative add-on Elements available. New 3D foam, logo and specialty fonts.

Today's software is a lot more affordable than you imagine

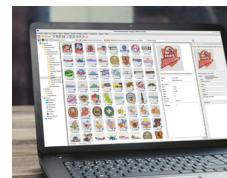

Product Visualizer

Accurately showcase customer designs on over 1000 hi-resolution products or add from your own collection. Email PDF to customer for approval.

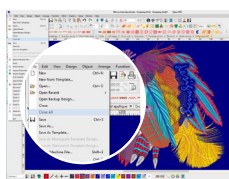

Order Job Feature

Store customer names, order numbers, due dates, product details, sizes, quantities, and colors, all in the .EMB design file.

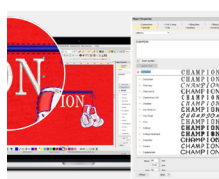

Integrated Design Library

Browse and manage your designs. Add customer information, categories and much more. All searchable for faster access.

Multiple Design Tabs

Work smarter and faster with multiple designs at the same time. When done, close all in a single-click with the new 'File > Close All' command.

216 Digitized Fonts

Full control and kerning of professionally embroidered, TrueType and OpenType fonts. Recently used fonts appear on top and all previews appear in solid lettering.

Advanced Color Management

Edit and select colors more easily, and auto-scroll to the object in the Color-Object list. A color wheel feature assists with perfect color combinations.

64-Bit / Windows 10

Built for 64-Bit systems, ES e4.2 is Windows 10 compatible and delivers significant performance improvements when working with large files in the fashion market.

Included Elements

6 add-on Elements as FREE STANDARD inclusions.

Paid add-on Elements

Looking to do specialist embroidery? There is an array of paid add-on Elements available, e.g. Sequins Advanced, Spiral Fill, Shading & Open Fills and many more.

Your business is missing out!
